**MEDICAL OFFICER QUALIFICATIONS**

Commissioned officers in the US Army Medical Dept, WWI, were organized into various corps. Commissions in the Medical Corps and the Medical Reserve Corps required a doctoral degree in medicine. Commissions in the Dental and Veterinary Corps also required appropriate professional degrees. Only the Sanitary Corps required no professional degrees for its officers. In late Nov 1918, the strength of the commissioned personnel in the two Medical Corps peaked at 30,591, all, presumably, doctors of medicine. At that same time, the officer strength of the Sanitary Corps was 2,919, some of whom could conceivably have been doctors. See:

U.S. War Dept. Surgeon General's Office. The Medical Department of the United States Army in the World War. Vol. I. Wash, DC: GPO, 1923. pp. 762-63, 766-67, & 794-95.  
UM24.1917-18.A25.

\_\_\_\_\_. Report of the Surgeon General, U.S. Army, to the Secretary of War, 1919. Vol. II. Wash, DC: GPO, 1919. p.1111. UM24.1917-18.A4.

It seems reasonably certain that the term "Medical Corps" with an officer's name indicated a doctor. On the other hand, an officer's name identified with "Medical Detachment" may indicate a doctor, a veterinarian, a dentist, or an officer of the Sanitary Corps.
