

CDC DEBRIEFINGS, VIETNAM WAR

LIST & INDEX

US Army Combat Developments Command (CDC) conducted its own internal debriefing program on Vietnam service. It was more limited in scope than the Senior Officer Debriefing Program concurrently conducted under the auspices of the Asst Chief of Staff for Force Development (ACSFOR). The internal CDC program identified Vietnam veterans assigned within CDC and selected some to prepare brief written reports and others to undergo in-depth interviews. Summarized information from these individual reports and interviews went into computer data banks. The retrievable data was periodically synthesized and distributed in summary reports.

This listing identifies only those individual reports and command summaries on file in MHI (MACV Command Historian's Collection: CDC-DBrfs). The index identifies basic subjects in the command summaries only.

INTERVIEW
